Project Lockedme.com

The lockedme.com project aims at providing a prototype to user to add delete and search files
it allows user to see the files in the directory sorted in ascending order
The main USP is user can easily search, add, delete and see directory contents by just running the app
The app is built on various core java concepts which involves, interfaces, abstract classes, Collections, Exception handling, Control statements

Scrum methodology:

1. Backlogs:

Product Backlog ⊚ 1   Filter

①	①	①	③
Menu Driven display	Display contents of Directory	Add,delete and search file	exit and close application and push to github
①	②	②	③
Menu Driven	Display Directory Contents	Display Directory Contents	Add, Delete and Search user file
2	2	2	1
Done	Done	Done	Done
♨ New task	♨ New task	♨ New task	♨ New task

＋ New card

2. Sprints

⚲ Sprints overview

Create a new sprint: ◈ **Create new sprint**

⚠️ *Note: The Sprint number must be a number. You can add a description in the code name field.*

Sprints

Sprint Number ▯	Code Name	Start Date	Start	Active
1	Menu Driven	Nov 27	Start	☐
2	Display Directory Contents	Nov 28	Start	☐
3	Add, Delete and Search user file	Nov 29	Start	☐
4	Exit App and upload to Github	Nov 29	Start	☐

+

⚠️ *Note: Click on the Start button when the sprint starts, this will fill the start date and set the sprint to 'Active'.*

GitHubDesktopSet...msi

3. Burndown Chart

Burndown Chart
